UNIT 7

	NAME	Define matter, mass and volume, identify and name instruments and basic units to measure mass and volume and describe methods of measurement.	Name the colour, texture, elasticity and other simple differentiating specific properties of substances and materials.	Define pure substances and mixtures and identify pure substances and mixtures in the immediate environment.	Name the states of matter and identify the state of objects and substances from their immediate environment.	Identify, name and describe changes of state and find the causes that produce them.	Define combustion and name the elements involved and those produced. Identify and name common fuels.	Define material, identify and name natural and man-made materials and describe their use in human activities.	Do a project on materials in the home and present the information in a chart.	Find out the story of a material and prepare a poster with the information.	Pay attention and show curiosity in carrying out experiments. Submit hypotheses to explain the changes that are being observed.	Understand information, acquire vocabulary about matter, express knowledge and opinions both orally and in writing and show interest in reading texts about matter.	Know and use mathematical elements, operations and strategies to measure mass and volume.	Obtain and organise information, working with the unit structure, and using digital resources with interest and responsibility.	Show initiative, accept mistakes when doing self-evaluation, persevere in reinforcement tasks and actively participate in cooperative learning exercises.
